

## Are you meeting the requirements of Electronic Prescriptions for Controlled Substances (EPCS) regulations?

Become Compliant with New Regulatory Mandates Quickly and Easily with  
**EHO's Rx Queue ePrescribing**

**Rx Queue** is integrated into EHO's claims processing platform to make ePrescribing adoption easy - no need to enter patient information again

### What are the benefits?

- Improve patient safety with reduced prescription errors
- Instant clinical alerts for medication interactions and allergies
- Be formulary compliant and help reduce costs to your patients
- Efficient medication reconciliation workflow
- Includes First Databank Drug (FDB) MedKnowledge that provides actionable medication decision support and care guidance

### How is it EPCS compliant?

- DEA audited and approved
- Identity Proofing included
- 2FA (2-factor authentication) enabled

Work within the platform you are already using by processing electronic prescriptions directly from the EHO dashboard. **One-time setup is simple.**
