

More than a **claims processing solution** — gain access to an entire coding and customer service team

Reduce administrative burden and leverage robust tools with PBM360™ claims processing platform

It takes a PBM to know what works best for PBMs

EHO is a PBM and the developers of PBM360™. The company has utilized its claims processing platform for its own clients since 1993. The proprietary, cloud-based claims processing platform is now available as a private-label, turnkey technology solution to other PBMs seeking to control costs and automate their workflow. The best-in-class platform is both flexible and scalable.

EHO operates as a **third-party administrator of claims** for PBMs using its proprietary, cloud-based PBM360™ claims processing platform

PBM360™ adopts your business rules

The PBM360™ interface can be customized for a nominal fee. Since the proprietary platform is 100% coded by EHO employees, it is easily tailored to meet each client's needs. Lead time for setup is minimal. Onboarding of existing groups is performed through an sFTP. PBM clients will continue to run their business and PBM360™ will provide the automation to support their growth.

Unlimited groups within a single account

Set parameters per group

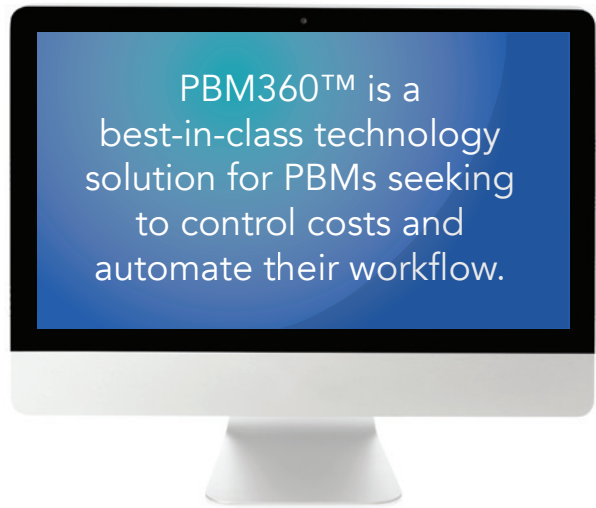

30+ standard reports

Option to request custom report templates

Fee-based Claims Processing Platform for PBMs

The PBM360™ platform is client-branded for EHO's private-label PBM clients. With user-specific login permissions, the platform facilitates access to PBM administrators with global control, PBM support staff for task-specific access, and individual patients for viewing their prescription history. EHO's national pharmacy network also leverages the PBM360™ platform to capture real-time transactions and provide a complete view of prescription and claims status.

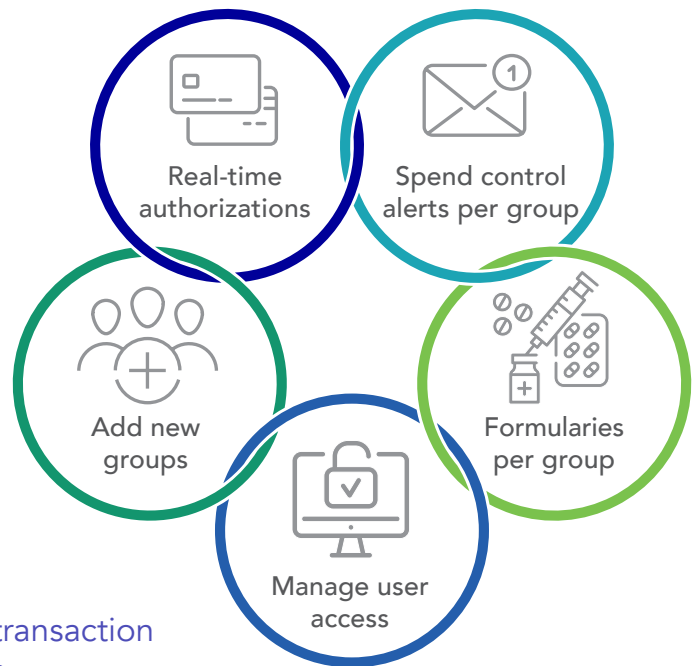

PBM360™ client and member support

While the developer at EHO work on enhancing the online experience, the customer service and account management team are assisting PBMs, their clients, and their client's members.

PBMs can expect a hands-on approach to:

- Benefit design implementation
- Custom formulary setup
- Technical assistance
- Claims management oversight
- New user training
- 24/7 live call center support

New Feature

Allows users to create rulesets per transaction (authorization by drug) on their own

EHO combines technology with exceptional customer support to manage patient/member Rx benefit programs while providing innovative solutions to control plan costs.
